History

Gotham is a geometric sans serif typeface designed in 2000. Released in 2002, it was originally commissioned by GQ magazine to have a “masculine, new, and fresh” aesthetic. The design was inspired by architectural signage from the mid-20th century found on buildings in New York City, particularly the lettering on the Port Authority Bus Terminal. This gives the typeface a distinctly American feel, unlike many other sans-serif fonts which were Swiss or German in origin.
